

Nakuja internship
Team meeting

Progress report format

Tasks completed last week

- Worked on machining the N-2 rocket

Tasks in this week

- Research on STM-32 blue pill
- Learned PCB etching
- Acquire **GY-80 L3G4200D ADXL345 HMC5883L BMP085** from **K-technics**
- Research on the MPU6050
- Research on the BPM 180
- Research on the GY-271 module

Timeline

Month	Week	Tasks
Mar	Week 1	Research and acquisition of sensors/Familiarize with PCB etching
	Week 2	GY-80 L3G4200D ADXL345 HMC5883L BMP085 & Ignition system programming
	Week 3	Casting propellant
	Week 4	Static firing tests
Apr	Week 1	Avionics bay development
	Week 2	Airframe integration
	Week 3	Integration with propulsion
	Week 4	Launch of the N-1 rocket
